

# Mining Product Support

G&G Mining is a Perth, Western Australian based specialist in the design, manufacture, repair and refurbishment of high-quality engineered mobile mining equipment attachments, components and supply of associated services.

## Workshop Facilities

- 3500m<sup>2</sup> Workshop, 512m<sup>2</sup> Office building, 28,800m<sup>2</sup> of land (2.9ha)
- Main Workshop:
  - 2 x 32 tonne over head cranes
  - Each crane having a 10t axillary hook
  - Maximum 64 tonne dual lift
  - 10 metre hook height
- Processing Workshop:
  - 10t overhead crane
- Paint & Blast
  - 600m<sup>2</sup> State of the art blast & painting facility

## Fabrication

- Refurbishment and overhaul – excavator, face shovel, wheel loader buckets, booms, trays and components.
- General and custom fabrication services. E.g. chutes and hoppers, dead weights plus much more.

## G&G SERVICES

### Fabrication Services

- Refurbishment and Overhaul (Hazelmere, On Site)
- Bucket, Tray, Boom and Stick refurbishment and repair
- Water tank refurbishment and repair
- Paint and Blast
- Site Services and Labour Hire
- Wear mitigation

### Engineering Services

- Engineering Analysis and Design
- Wear and Materials Consultancy
- 3D Scanning Services

### Hardox Wearparts®

- Wear Packages, Wear Protection and Materials Supply

# Mining Product Support

G&G Mining is a member of the global Hardox® Wearparts network - a worldwide network of wear service centers. We provide wear solutions, wear services and wear parts that keep industries up and running with optimised productivity and service life.

Our Wear Parts and services business includes on and off-site repairs, refurbishment and maintenance of mobile equipment attachments, custom fabrication services as well as the direct supply of Hardox®, Strenx® and Duroxite® materials as plates or parts for a wide range of applications (buckets, dump truck trays, chutes, hoppers, crushers, shredders, balers and more) and across a wide range of thicknesses and grades.

Our Service and Engineering teams work together with our customers to understand their application, the abrasive materials and desired maintenance cycle in order to recommend the best wear solution. G&G can also offer wear audits, 3D scanning, reverse engineering and custom fabrications to support such applications.

## Dump Bodies and Mining Buckets

High productivity Equipment - This unique high strength steel formula delivers the lightest, hardest working products available in the mining and earth moving industry.

Offering increased volumes and reduced weight, they can handle larger payloads than their counterparts; increasing the productivity of your asset and reducing your cost per tonne whilst extending asset life.

## Heavy Duty Mining Buckets

G&G mining buckets that are stronger, lighter and more productive. Including backhoe, face shovel and wheel loader buckets to suit all major OEM mining excavators.

## Water Tank Modules

G&G designs and manufactures an extensive range of water tank modules to fit both off-highway and on-highway truck chassis and articulated underground haul trucks in capacities from 15,000 litres to 160,000 litres.

We can work with you on a Water Tank Module solution that fits your needs.
